

MACK INDUSTRIES

"Quality and Service Since 1932"

Volume 10

My Tank Needs Pumped. - What does that Mean?

A well maintained system is normally pumped every 3-5 years and a Mack Technician will check the levels in the system and note if you need to pump on the report.

If excessive quantities of grease, hair, wipes, or other items that the bacteria is unable to breakdown may require the entire system to be pumped.

If all chambers of the Norweco Singlair need pumped, the system holds 1300 gallons total.

Who Should I Call?

The local Health Department has a listing of all Licensed, Bonded and Vehicle Inspected septic haulers for your area.

If you need further assistance, please call our office, we will be happy to assist you.

Why Choose **MACK INDUSTRIES**?

- Locally Owned and Operated.
- Experienced Technicians.
- Provide maintenance and repairs, not just inspections.
- Over 50 years of experience installing and designing Sewage Treatment Systems.
- Norweco and Jet Distributors.

Remember, Prevention is the best form of defense!
